Financial Constraints

Access to Health Care: Health care related to financial strain including limited insurance coverage, a struggle to afford the high costs of health care, and legal status.

Definition: Anything associated with personal, familial, or other noncitizen status related to the lack of health care resources to purchase health care.

Cost of Care

Definition: Coordinating health care providers, provider-patient interactions, and related barriers and obstacles that have arisen specifically from the barriers of high-cost cancer treatment, out-of-pocket treatment, and similar factors. Includes barriers associated with the specific ability to afford insurance or high cost of hospital bills due to noncitizen status.

Exclusion Criteria: Anything related to barriers and obstacles that are unrelated to conflicts in childcare are excluded. Exclusion Criteria: Anything related to a flaw in health care delivery due to a lack of education or knowledge about all aspects of being diagnosed with breast cancer and treatment.

Health Literacy

Definition: Barriers relating to a lack of understanding or knowledge of breast cancer and the provider-recommended treatment plan.

Exclusion Criteria: Anything associated to the high costs specific to cancer treatment, out-of-pocket, high costs related to transportation and other factors that are not in direct reference to the high costs of cancer treatment and therapy.

Interruption of Care

Definition: This barrier relates to the lack of financial options in a current non-citizen status in relation to or support from health care providers or other social factors related to the high costs from other areas in the patient's cancer treatment.

Exclusion Criteria: Anything related to conflicts between familial culture and medical treatment of cancer acting as a barrier to treatment.

Leukemia

Definition: This barrier refers to the diagnosis to the treatment of breast cancer.

Exclusion Criteria: Anything related to gaps in the patient's experience of specific social, emotional, or educational support systems.

Transportation

Exclusion Criteria: Anything related to gaps in insurance coverage, minimum insurance, lack of, any insurance coverage, co-payments, deductibles, and medical bills are included in these cases.

Trust in Health Systems

Definition: Patient experiencing distrust of specific provider, lack of familial support, or other factors not specifically related to conflicts of Hispanic culture and cancer treatment.

Visits

Definition: Experiencing barriers to seeking treatment due to lack of social factors and emotional support systems.

Exclusion Criteria: Anything related to gaps in insurance coverage, minimum insurance, lack of, any insurance coverage, co-payments, deductibles, and medical bills are included in these cases.

Care Coordination

Definition: Anything not associated with the commitment and need to work interfacing with the patient’s treatment.

Exclusion Criteria: Barriers unrelated to competing responsibilities or accessibility are not included.

Children's Access

Definition: This barrier refers to referring patients to specific providers for surgery and other treatments; this barrier also refers to issues in health care delivery influenced by the providers’ access to resources and sufficient health care.

Exclusion Criteria: Barriers unrelated to a lack of knowledge about all aspects of being diagnosed with breast cancer.

Emotional Support

Definition: Experiencing barriers to seeking treatment due to gaps in health care delivery, as well as issues related to support systems, namely Hispanic culture.

Exclusion Criteria: Anything related to conflicts between familial culture and medical treatment of cancer acting as a barrier to treatment.

Cost of Care

Definition: This barrier refers to the diagnosis to the treatment of breast cancer.

Exclusion Criteria: Anything related to gaps in insurance coverage, minimum insurance, lack of, any insurance coverage, co-payments, deductibles, and medical bills are included in these cases.

Enrollment
