APPENDIX A. Survey Questions Utilized in This Study

1. Which year of Pediatric Critical Care Medicine fellowship training are you currently in?  
   First  
   Second  
   Third  
   Fourth

2. Approximately how many medical resuscitations in the Pediatric Intensive Care Unit have you participated in during your fellowship training?  
   1–5  
   6–10  
   11–15  
   16–20  
   >20  
   Not applicable. I have not participated in any medical resuscitations in the PICU

3. Does your pediatric critical care medicine fellowship program follow a structured format for debriefing the team after a medical resuscitation?  
   Yes  
   No

4. Approximately how often does debriefing occur after a medical resuscitation in the Pediatric Intensive Care Unit?  
   0% of the time  
   25% of the time  
   50% of the time  
   75% of the time  
   100% of the time

5. On average, when a debriefing occurs in the Pediatric Intensive Care Unit, what is the typical time elapsed since the medical resuscitation?  
   Immediately after the event  
   Within 6 hours of the event  
   6–24 hours after the event  
   1–4 days after the event  
   1 week or more after the event  
   Not applicable. Debriefing does not occur after medical resuscitations in the PICU

6. Who has typically been present for the debriefing sessions that have taken place in the Pediatric Intensive Care Unit? Please select all that apply.  
   Pediatric critical care medicine attending  
   Pediatric critical care medicine co-fellow  
   Fellow in another specialty  
   Resident  
   Nurse  
   Social worker  
   Chaplain or Rabbi  
   Anesthesiologist  
   Respiratory therapist  
   Family member  
   Not applicable. I have not seen or been involved in a debriefing session in the PICU  
   Other (please specify)

7. Who typically leads the team debriefings after medical resuscitations in the Pediatric Intensive Care Unit? Please select all that apply.  
   Pediatric critical care medicine attending  
   Pediatric critical care medicine fellow  
   Resident  
   Nurse  
   Social worker  
   Chaplain or Rabbi  
   Family member  
   Not applicable. I have not seen or been involved in a debriefing session in the PICU  
   Other (please specify)

8. How comfortable do you feel leading a debriefing after a medical resuscitation in the Pediatric Intensive Care Unit?  
   Very comfortable  
   Somewhat comfortable  
   Neutral  
   Somewhat uncomfortable  
   Very uncomfortable

9. Have you ever been formally taught how to debrief a team after a medical resuscitation in the Pediatric Intensive Care Unit?  
   Yes  
   No

10. Would you be interested in learning more about how to lead a debrief after a medical resuscitation in the Pediatric Intensive Care Unit?  
    Yes  
    No

11. How do you rate the utility of debriefing for improving future performance of care team members during medical resuscitations?  
    Very useful  
    Somewhat useful  
    Neutral  
    Somewhat detrimental  
    Very detrimental  
    Not sure

12. How do you rate the utility of debriefing for promoting the health and emotional well-being of care team members?  
    Very useful  
    Somewhat useful  
    Neutral  
    Somewhat detrimental  
    Very detrimental  
    Not sure

13. Since the start of the COVID-19 pandemic and the institution of social distancing practices, has the frequency of formal debriefings increased, stayed the same, or decreased?  
    Increased  
    Decreased  
    Not sure
